EDUCATION

UNCuyo University | 2010 – 2017
Industrial Engineering

UTN University | 2012 – 2013
Programming course

SKILLS

Typescript	JavaScript	React	PostgreSQL	Supabase
Trello	Illustrator	Figma	Git	Docker	Python

EXPERIENCE

KidsOnCoffee Agency | 2014 – 2016

Frontend development focused on the optimization and adaptation of audiovisual and graphic assets to deliver a smooth and efficient user experience. Collaborated with designers and UX teams to transform concepts into modern, cutting-edge interfaces.

Pedidos Ya – Front End | 2017 – 2019

Semi-Senior first year, then promoted to Senior. Developed scalable frontend solutions for Latin America's largest delivery platform, with a strong focus on building intelligent and reusable React components. Collaborated with international teams.

Acuario Tech – Owner | 2019 – 2022

Founder of a crypto housing venture that capitalized over USD 750K in mining infrastructure, operating industrial-scale facilities across three large warehouses. Successfully mined for external investors for three years, achieving returns of up to 240%. Later transitioned the business into a crypto project with the Aqua Token, which was put on hold following the onset of the bear market.

Bigsys Software – Software Led | 2023 – 2024

Led frontend development team for Web ERP Software platform. Managed cross-functional workflows, technical architecture decisions, and coordinated with backend teams.

Davivienda – Exchange consultant | 2024

I carried out consulting for an RWA token exchange, specifically adapting the strategy to a software architecture development.

Nooble.ai – Freelance | 2025 – Finished

Development of a Python backend for AI agent creation, architected as 7 microservices with support for code replication both horizontally and vertically (Docker and Kubernetes), RAG Tecnology and Redis chache-stream comunication database. Designed a multi-tenant architecture capable of handling 10,000 requests per second on a small server, with scalability for future growth. Coordinated technical roadmap and workflow optimization for complex AI-driven applications.
